**A TIME FOR
CHANGE**

A HISTORY OF PCEI

PCEI was established in 1986 by area citizens in reaction to local and international environmental issues including:

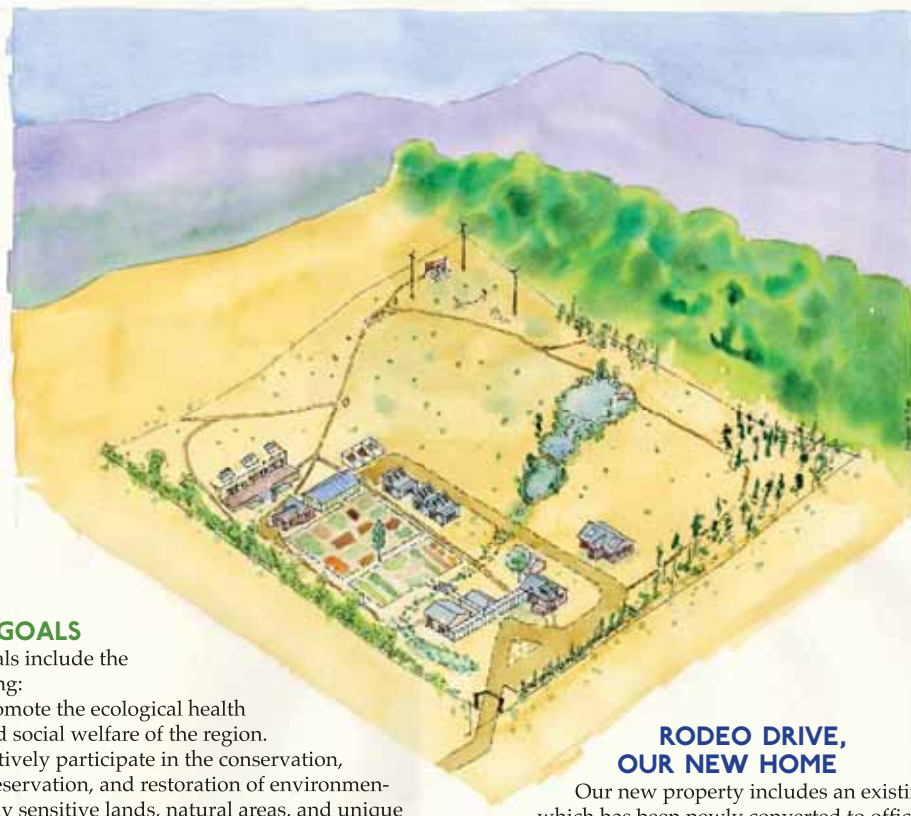

- waste and recycling
- fish and wildlife habitat
- public health concerns
- water quality and ground water issues
- sustainable agriculture and pesticide use
- transportation
- alternative energy

PCEI has consistently capitalized on immediate environmental issues, converting them into opportunities for long-term community growth and improvement.

PCEI has received many awards including:

- City of Pullman Mayor's Award, April 2005
- Sustainable Northwest, *Founders of a New Northwest*, September 2001
- Green Star Award, January 1997
- EPA Transportation Partners, Healthy Transportation Choices Recognition, February 1997
- Rivers Council of Washington, Certificate of Merit, April 1995

1"=20' PCEI RODEO DRIVE MASTERPLAN

OUR GOALS

Our goals include the following:

- Promote the ecological health and social welfare of the region.
- Actively participate in the conservation, preservation, and restoration of environmentally sensitive lands, natural areas, and unique ecosystems.
- Provide a forum for the free exchange of views in these matters of concern to the public.
- Inform and educate the public on important regional environmental issues to promote a well-informed, active, and concerned citizenry.

RODEO DRIVE, OUR NEW HOME

Our new property includes an existing house which has been newly converted to offices, a second office building, several outbuildings, a pond and lots of open space.

The possibilities for PCEI to demonstrate our commitment to environmentally friendly choices are endless. We expect to continue our role as an environmental resource for the community by offering public demonstrations of practical and sustainable choices as we “live” them on the new site.

SUCCESSFUL PROGRAMS

— PCEI has been involved in 12 wetlands and 40 stream restoration projects in the region.

— Our education program offers more than twenty program reaching over 2,100 students and 42 K-12 teachers annually.

— Nearly 900 community volunteers contributed 6,500 hours to programs last year.

— PCEI is now a regional AmeriCorps center, responsible for assigning 46 AmeriCorps members to various environmental restoration and education projects in Idaho and eastern Washington.

A NEW ERA FOR PCEI!

After 19 years in a small downtown office the Palouse-Clearwater Environmental Institute has loaded up its trucks, shovels and computers and moved to a homestead sited in the north side of Moscow, and has launched a capital campaign to support the purchase and renovation of the property.

Three long years were spent looking for an ideal location and an office that would be more than just a place for desks and supplies. That ideal spot was found on 7.6 acres at 1040 Rodeo Drive in Moscow. In mid-December 2004, PCEI made the across-town move in three intense hours, with the help of 40 volunteers. These past few months have given PCEI time to unpack, rearrange and even dig a few beds for a future community garden.

We invite you to be a part of an exciting time at PCEI!

GOALS FOR THE PROPERTY

Goals for this beautiful, largely undeveloped and typical “Palouse prairie” site include open space preservation, rainwater collection, examples for “green” building practices, and alternative energy systems, providing a great opportunity for PCEI to function as “an urban nature center” for our area. Our stream restoration projects, our environmental education work, and our community garden will all benefit. Our plans include improved wheelchair access, composting toilet facilities, parking spaces, as well as trails, interpretive sites and open space for the public to explore and learn.

A CHOICE FOR THE FUTURE

Now is the time to help make PCEI’s dream possible.

PCEI invites you to become a part of our vision by making a special financial contribution. Your gift will be used to help us to meet our capital campaign goal of \$500,000. To date, more than \$214,000 has been raised toward our goal and we thank the many kind and generous contributors to PCEI. We offer special recognition for gifts at higher amounts. With a \$500 contribution, we will put your name on a pathway stone leading to the house. Opportunities are available at many levels, including having your name on a building, rooms, windows, or even a composting toilet!

There are many options for giving, including multi-year pledges, gifts of stocks and securities, and donations of materials. Please contact our office if you would like to speak with someone about a pledge, learn more about the recognition options, or if you’d like to make a gift in the form of stocks or bonds.
